Communication Sets DS-20-1

5 Way - Wired Communications Set (above)

Nova Blast Helmet with Integrated Communication Set (above)

Wireless Radio Communications Set

COMMUNICATION SETS :

- Our systems allow essential communication between blasters, pot man and supervisor.
- The Speakers and Microphone can be either mounted as an Ear-Defender type OR directly into the padding of a Blast Helmet.
- Wired sets are normally used for use in areas where a radio signal may be lost or poor. There are a variety of options for number of users (up to 5), and cable lengths.
- Wireless systems have a headset connected to a VHF handset. These are ideal for most sites and have a range of up to 2 miles.
- All our systems use a large PTT (Push To Talk) button.
