

# Silvagrip® PEEL & STICK Marine Non-skid

**Increase safety. Eliminate hassles. Save money.**

**Reduce maintenance costs.** Long life-cycle of 10+ years.

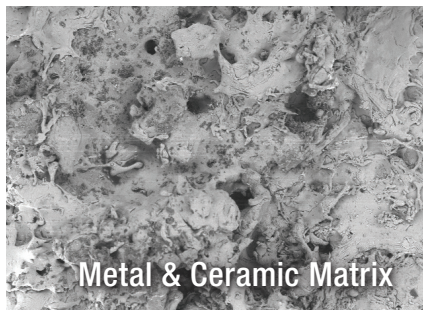

**Cut application down-time.** Easy to install peel and stick. No waiting – surface is ready to use immediately.

**Eliminate epoxy non-skid nightmares.** No ventilation required. No maximum overcoat window.

**Reduce slips and injuries.** Silvagrip® has the highest possible coefficient of friction anywhere.

Surface Finishing  
Equipment Group

Metal & Ceramic Matrix

Only Silvagrip's® ceramic abrasives are perma-locked into a sophisticated metal alloy substrate.

Traditional resin-base non-skids suffer from grit pull-out, meaning early wear-out. But with its metal matrix, Silvagrip® lasts many times longer.

It is simply the strongest, hardest and longest-lasting wear surface available anywhere.

## Features

- Long-life, permanently-safe surface
- Adhesive withstands deck temperatures up to 400°F
- Usable on all metals
- Flexible – conforms to any deck substrate
- Lightweight and paintable
- Easy to clean by scrubbing or pressure washing
- Oil and chemical resistant
- Easy to repair or replace even at sea
- Corrosion-proof, water-proof, UV-proof
- Use in all weather environments
- Resistant to wear (Ceramic Rc60+)
- Approved and used by U.S. Navy

Destroyer Deck - U.S.Navy
