SAFETY DATA SHEET

ABRABLAST

Abrablast is a product made from recycled glass, and a controlled mixture of inert recycled products refined and screened to yield a graded material suitable for use as an abrasive in blast cleaning operations.

This material contains no crystalline silica (quartz) and is virtually free of heavy metal contaminants, including magnetic materials, free inorganic materials including salts, and organic matter

It is suitable to use on most substrates including steel, metals, concrete, stone and wood. This product is advantageous where traditional abrasives, such as copper slag, would present problems of contamination.

APPLICATIONS:

Especially suited to our SAT Blast Wet Blast System, but can be used in any application where you would normally use an expendable abrasive.

GRADES / PARTICLE SIZES:

Medium	0.2 – 1.5 mm
Fine	0.2 - 0.7 mm

Health Effects - Eyes	Dust may cause slight transient irritation.
Health Effects – Skin	Repeated or prolonged contact may produce irritation.
Health Effects - Ingestion	None known
Health Effects - Inhalation	Exposure to dust may have the following effects:- irritation of nose, throat and respiratory tract,

4. FIRST AID MEASURES

General:

In all cases of doubt, or when symptoms persist, seek medical attention. Never give anything by mouth to an unconscious person.

Inhalation:

Remove to fresh air, keep the patient warm and at rest. If breathing is irregular or stopped, administer artificial respiration. Give nothing by mouth. If unconscious, place in the recovery position and seek medical advice.
