Equipment Group

## DEADMAN HANDLES

In operation a Remote Control or 'Deadman Handle' attached to the blast hose, is held shut closed by the operator. When the operator releases the handle (intentionally or in the event of an accident) the signal is stopped via control hoses to a valve on the blast vessel. This depressurises the machine and stops the blasting process.

(1) RM-21 – STEEL HANDLE	
Typical Uses : Fitted to many of our portable blast pots as standard	
RM-21A	Handle Complete
RM22	Rubber Button Washer
RM27	Spring
(2) STANDARD	
Typical Uses : A rugged handle fitted to many of our hire pots	
DMH150	Handle Complete
DMHR1	Rubber Washer
(3) NON BLEED	
Typical Uses : This handle does not bleed air in its open position to save air consumption.	
100-263	Handle Complete
263-525	Repair Kit
(4) SAFETY	
Typical Uses : This handle has a safety catch to lock in it's open position.	
SDH-1	Handle Complete
SDH1-6	Rubber Washer
(5) QUICK STOP II BALL TYPE	
This low fatigue device has a ball on a wrist lanyard which detaches if the operator drops the hose or intentionally pulls the strap to stop the blasting process.	
QSDH	Quick Stop II Handle
