## FULL FACE CARTRIDGE RESPIRATOR

Respirator with Triplex Glass

A2P3 Cartridge

The selection and use of the correct Personal Protective Equipment is essential to effectively protect users from risk by creating a barrier against workplace hazards.

Our SARI full face respirator is ideally suited to a spray painting application, as it has a Triplex Glass safety screen which can be wiped clean when overspray forms in it.

### FEATURES :-

- CE Certified to EN136
- Provides face and eye protection
- Large distortion-free visor
- Comfortable to wear even for long periods with five-point rubber harness

The Mask can be configured in 2 different ways :-

- **Cartridges -**  
Normally used with combination A2-P3 cartridge for paint spraying.  
A2 - Gases & vapours from organic compounds with boiling point above 65°C  
P3 - Solid & liquid, radioactive & toxic particles & microorganisms
- **Air Fed -**  
For more toxic paints such as isocyanates, the mask can optionally be fit with a belt mounted regulator and air tube. This provides a higher level of protection but requires an a suitable compressed air supply of breathable quality in accordance with EN12021. A filter such as the Radex is needed.

Where in doubt the manufacturers data sheet for the material should be consulted.

Note :

This product only provides correct performance when used in accordance with manufacturer's instructions.
