XT Pneumatic Airless Sprayer

The XT Pneumatic Airless Pump is high-pressure air-operated Airless sprayer. Ideally suited for spraying protective coatings. The name 'airless' derives from the fact that the material being sprayed is atomised by hydraulic pressure at the spray tip. Working at high pressures, the XT is designed to cover large surfaces quickly with the toughest coatings.

Package Options :

- Can be Supplied as ready to go complete Spray Package with Spray Gun, Paint Line and Spray Tip, Suction Hose, and Air Regulator.
- Optionally can be supplied as Pump Only with Suction Hose and Air Regulator.

Typical uses :

- Application of protective coatings on ships, bridges, construction vehicles, railcars, or containers, as well as interior and exterior painting and decorating, and the application of fire protective coatings.

POPULAR MODELS AND SPECIFICATIONS

Model	Pump Ratio	Max. Recommended Spray Tip	Material Pump Displacement and Guide Output
XT45	45:1	0.055	250 cc 12.5 litres / min
XT56	56:1	0.051	220 cc 11 litres / min
XT68	68:1	0.047	180 cc 9 litres /min

Notes :

These products only provide correct and safe performance when used in accordance with manufacturer's instructions.
