FULL FACE CARTRIDGE RESPIRATOR

Respirator with Triplex Glass

A2P3 Cartridge

The selection and use of the correct Personal Protective Equipment is essential to effectively protect users from risk by creating a barrier against workplace hazards. Our full face respirator is ideally suited to a spray painting application, as it has a Triplex Glass safety screen which can be wiped clean when overspray forms in it.

FEATURES :-

- CE Certified to EN136. Provides face and eye protection
- Comfortable to wear even for long periods with five-point rubber harness
- Optional Tear off Visors

The Mask can be configured with Cartridges or Air Fed.

- **Screw in Cartridges -**
Normally used with combination A2-P3 cartridge for paint spraying which combines A2 - Gases & vapours from organic compounds with boiling point above 65°C, and P3 - Solid & liquid, radioactive & toxic particles & microorganisms
- **Air Fed -**
For more toxic paints such as isocyanates, the mask can optionally be used with a belt mounted regulator and air tube. This provides a higher level of protection but requires an a suitable compressed air supply of breathable quality in accordance with EN12021. A filter such as the Radex is needed.

Air Fed Set Up
shown below

This product only provides correct performance when used in accordance with manufacturer's instructions.
