## Features

Designed, engineered and built - all in the USA  
Aerospace grade materials used throughout  
High grade aluminium for the control box, motor cover and heat sink - aluminium dissipates heat, as opposed to plastic which retains it  
Steel cut and precision ground gears - running in synthetic grease for positive heat transfer  
Frame from chrome plated heavy walled steel tubing, immensely strong and tough  
TriTech proprietary carbide blend is used for the ball and seat to give a superior and positive shut off  
All covered by the unique TriTech warranty
